

UNIVERSITY OF TORONTO

Faculty of Arts and Science

term test #2
CSC236

Date: Monday March 23, 2020

Duration: 50 minutes

Instructor(s): Colin Morris

Please read the following guidelines carefully!

- This test is open book. You may consult your notes, along with any published course materials. Do not consult with anything or anyone else.
- If you would like clarification about a question, you can post it as a **private** question on Piazza, and I will answer it promptly.
- After 50 minutes, you must stop writing and upload your solutions to MarkUs. (I recommend setting a timer to avoid losing track of time.)
- You have **10 minutes** to upload your solutions to MarkUs (or 20 minutes if you are uploading handwritten solutions).
- We will accept just about any format, though a pdf is preferred. Your first priority should be getting your solutions into MarkUs *in some form* by the deadline. If you need to make superficial revisions afterward (e.g. rotating or cropping images) this is acceptable.
- More in-depth logistical details are available [on the course website](#)
- This examination has 3 questions. There are a total of **4 pages**, **DOUBLE-SIDED**.

Good luck!
